CHILDREN'S CRUSADE AGAINST COMMUNISM

23. Ghost City

The picture is an artist's idea of what an atom bomb could do to a great American city. The Reds like us to think of this. They think it will make us afraid. But actually, we are growing stronger by realizing that this *could* happen to us. We are working to make America stronger day by day, week by week. We must continue to work for peace through the United Nations and in every possible way. But an America fully prepared to defend itself is not likely to be attacked. The Reds understand this language.

FIGHT THE

RED MENACE
