Periodical Group Practice.—Individual workers must be trained, groups must be organized, groups must practice as groups. This is particularly true of staff corps: Certain emergencies might call for service of only a few, not all, of the different groups, but the staff corps goes into action on all calls.

Minimum staff corps practice should consist of—Hours—2. Period—Weekly. This schedule should be continued during the entire period of the national emergency.

Recommended Training Pamphlets.—Staff corps should familiarize themselves with all pamphlets described in following pages so that they can coordinate and direct, with understanding, the work of all groups. Of special significance is the "Staff Manual."

Types of Insignia.—Arm bands, uniform sleeve insignia, collar and cap ornaments, and civilian-dress lapel buttons only.

Restrictions for Wear.—Only enrolled staff members and workers who have successfully completed training courses listed above may wear insignia on uniforms, arm bands, civilian-dress lapel buttons or in any "official" manner. Such persons must be officers of or workers on the staffs of—

Duties.—Some of the bombs dropped in a modern air attack may fail to explode or may have delayed-action fuses. They must be removed at once to a place where they may be exploded without harm. Since this work requires an unusual degree of knowledge, skill, and devotion, it usually falls to a small group of picked men of the regular police force who have been carefully trained for this dangerous work.

Air Raid Wardens

Personnel.—Men and women—natural leaders who inspire confidence.

Percentages of Workers Necessary per 1,000 of Population—

Men	Women	Youths
6	2	

Duties.—The Air Raid Wardens are to many people the personal representatives of Civilian Defense. They are not policemen and do not have police powers, but usually function as part of the police force and with its help.

An Air Raid Warden's post is organized to serve a unit of 500 people. It is accessible and plainly marked. Since at least one person is always on duty, four Air Raid Wardens usually are assigned to each post.

The Air Raid Warden's duties include: (1) Observing lights showing during a blackout and warning occupants of the building; (2) directing persons in the streets to shelter; (3) reporting to the Control Center any fallen bombs; (4) reporting fires to the Control Center and assisting in fighting incendiary bombs as soon as they fall; (5) detecting and reporting to the Control Center the presence of gas; (6) administering elementary first aid; (7) assisting victims in damaged buildings; (8) to set an example of cool efficiency under all conditions.

AIR RAID WARDEN

Auxiliary Firemen

Personnel.—Men—strong, agile, good endurance, courageous. May be enrolled direct by Fire Department.

Percentages of Workers Necessary per 1,000 of Population—

Duties.—Since fire is one of the greatest threats in air attack, augmentation of the regular fire-fighting forces is necessary. A practical plan, used in Britain and already under way in a number of American cities, is the establishment of three auxiliary fire stations around each existing engine company. One officer or first-grade fireman is placed in charge of each auxiliary fire station and up to 30 enrolled volunteers, assigned on the platoon system, are allotted to each such station.

Their duties are similar to those of the regular fire-fighting forces—laying hose relays, operating small pumpers, and assisting the regular fire forces. They should equip themselves with suitable protective clothing similar to that worn by the regular forces.

Fire Watchers

Personnel.—Men—alert, keen, fast reflexes, age not over-important. May be enrolled direct by fire department.

Percentages of Workers Necessary per 1,000 of Population—

Men	Women	Youths	
10			

Duties.—The menace of the fire bomb calls for unceasing vigilance and prompt, intelligent action. Fighting incendiary bombs as they fall is a duty in which all able-bodied citizens need training.

After the Fire Department has trained its own auxiliary forces, it instructs citizens in the area, under each Air Raid Warden's post, in the method of fighting fire bombs. The Air Raid Warden of each post then selects and enrolls the most alert and suitable persons to act as Fire Watchers. During an air raid alarm, the Watchers take up posts on roofs, in doorways, and at other vantage points in order to spot and reach fallen bombs quickly.
