

## StoryMapJS: Gigapixel TUTORIAL

You can use [StoryMap's Gigapixel feature](#) to tell stories about photography or art, to delve deeper into the nuances of a document, or to show a journey on a historic map.

[View an example here](#)

To begin, you need a large image. It should be as high resolution as you can get it. You'll also need to know the image width and height in pixels as part of starting a Gigapixel StoryMap. Once you have a large image, you need to export it as tiles. This is called "zoomifying" the image. A link to [a free app that zoomifies for you](#) is provided on the website, or, [if you have Photoshop, you can use its "Zoomify" export feature](#).

When you have your image tiles, you need to put them on a web server. If you don't have a webserver, you can use Google Drive or Dropbox.

When you've got your image tiles up on a server, go to [storymap.knightlab.com/gigapixel/](http://storymap.knightlab.com/gigapixel/). Select the option to make a new StoryMap and choose the "gigapixel" button. Give your new project a name and enter the base url and image width and height mentioned above, and you're ready to tell your gigapixel story.

*Abraham Lincoln*  
 President of the United States,  
 by virtue of the power in me vested  
 as Commander in Chief of the  
 Army and Navy of the  
 United States, in time of  
 actual armed rebellion against the authority  
 and government of the United States, and as a fit and necessary war measure for suppress-  
 ing said rebellion, do, on this first day of January, in the year of our Lord one thousand  
 eight hundred and sixty three, and in accordance with my purpose so to do, publicly proclaimed for the  
 full period of one hundred days from the day of the first above mentioned date, and designate as the States  
 and parts of States wherein the people thereof respectively are this day in rebellion against the United States, the  
 following, to wit: Arkansas, Texas, Louisiana — except the parishes of St. Bernard, Plaquemines &  
 Jefferson, St. John, St. Charles, St. James, Ascension, Assumption, Terre Bonne, Lafourche, St. Mary,  
 St. Martin and Orleans, including the city of New Orleans — Mississippi, Alabama, Florida.

**THE DESIGN**

**B I </> 🔗**

This elaborately decorated copy of the Emancipation Proclamation was designed by a fourteen-year-old boy in California. Benjamin F. Butler, who was a California pioneer of 1849 and established the first lithographing plant on the West Coast, may have

You can place the marker on any point in the image to point the screen to that place. You can also choose the zoom level by adjusting the + and - buttons on the upper left hand corner of the screen. Place your slide title in the heading box and start typing your description in the body box. You can use their simple tools to bold, italicize, and hyperlink, or you can use the HTML editor if you're a little more HTML-savvy.

## LINCOLN'S EMANCIPATION PROCLAMATION

**B I </> 🔗**

The *Emancipation Proclamation* is the document that Lincoln felt would cement his name in history. It stated that all enslaved people within the states in rebellion were free. Although the document was not accepted in the Confederacy and therefore did not immediately free any slaves, it is considered one of the most important in American history.

**⚙️ Slide Options**

You can adjust design elements, such as the background color, or add a background image, by going to “Slide Options.” For each new slide, you can simply move the marker to go to the point that you’d like to focus on. Even though it feels like you are moving the marker from the previous slide, it won’t change anything from the last slide.

Once you've added all the slides you want to add, click "Save" and your Gigapixel StoryMap will be ready to share with the world!
